Environoc 401 -Lawn, Turf Care

Biodyne Midwest is an Environmental Biotechnology Company that cultivates naturally occurring microbes for environmental applications.

Environoc 401 Lawn / Turf Microbial LIQUID Product-29 Strains
of Naturally Occurring Microbes for enhanced Rhizosphere (root microenvironment)

Capabilities:

- Enhanced growth and health of turf and lawns via enhanced rhizosphere activities
- Numerous Benefits: better nutrient uptake, increased root mass and depth, massive increase in soil microbial activity, drought resistance, disease and parasite resistance
- Significant Reduction in Fertilizer Inputs
- Beneficial Microorganisms specifically isolated for More Productive and Healthy Soil
- 100% Natural, Fresh, and Viable Microbes-Trillions per gallon, Foliar Application
- Safe for pets and children, Non-Toxic, Non-Pathogenic, and "Green"

Applications:

- Home and commercial lawn application for general health and reduced fertilizer needs
- Golf Course greens, fairway and landscape amendment for healthy root system and reduce fertilizer
- Sports fields, schools, parks, anywhere grass is grown
